

LAY DOWN YOUR FEAR

You are, afraid, one thousand faces over you
You feel the pain, you feel like goin' insane

No solution, only screams in the night (in the night)
No solution, no illusion no way, no, no, no way

Lay down your fear
believe in you
Don't hide your ability
Break down the walls
Raise your hands
So find your way
into the light

You cry (you cry), each night (each night)
Caught by the shadows of the past
You're down and out
You feel the sunlight is gone

No solution, only screams in the night (in the night)
No solution, no illusion no way, no, no, no way

Lay down your fear
believe in you
Don't hide your ability
Break down the walls
Raise your hands
So find your way
into the light

So many things are good in life (good in life)
Now is the time, to take your chance (take your chance)
Don't be afraid you're not alone (you're not alone)
I stand by your side, we're ready to ride

Solo

2x Chorus

Light – into the light
Light – into the light
